

# Join us to be UC Ready

## UC Ready:

### Continuity Planning

A systemwide program that enables all UC locations to better prepare to meet the challenges of resuming business operations after a major event occurs.

## Self-check questions for effective business continuity planning and resilience strategies.

- What would your department do in the event of a network outage?
  - What IT systems and applications are essential and how soon would you need access restored?
  - Are vital records backed-up on a separate drive or are there hard copies?
- What would your department do in the event that your building is inaccessible for a long period of time due to a flood or fire?
- What will happen if you cannot continue your essential function?
  - How long until this impacts teaching, research, operations, finance and compliance?
